- All aluminium in gold or silver also available in 12 inch
- Chrome available in 12 inch with black surround only

- Brass or chrome viewers
- Aluminium door knockers
- Extensive range

# Secured by design

Secured By Design is a scheme run by the Police to help homeowners choose security products that meet rigorous Police-approved standards. When you see the Secured By Design logo you know you're choosing products that have been rigorously tested and approved by the Police.

To achieve accreditation the lock must withstand a series of tests, including a simulated break-in.

## PAS023/024

✓ PAS 23

✓ PAS 24

Like Secured by Design, the PAS023/024 quality marks demonstrate that a product has met certain security standards. These Kitemarks are developed and awarded by the British Standards institute to PVC-U doors that successfully pass a series of security tests that simulate techniques used by burglars and, through cycle tests, indicate their performance over extended use.

Unlike Secured By Design, PAS023/024 are tests of the complete door and take into account other security features, such as glazing security.

## The Safeware difference

- The UK's largest independent hardware distributor
- Exclusively recommended by Profile 22
